WHAT TO EXPECT AS AN ECONOMICS GRADUATE STUDENT

September 2014

This document is a guide to the Graduate Program in Economics at Universidad Carlos III.

1. ACADEMIC ORGANIZATION OF THE GRADUATE PROGRAM

The Graduate Program in Economics at Universidad de Carlos III consists of the two-year Master in Economic Analysis, followed by a three year PhD in Economics. The Master in Economic Analysis is aimed at equipping students with the quantitative and analytical tools that modern economic analysis requires. After following a core curriculum in the first year, students choose a number of specialized field courses in the second year that bring them to the research frontier. In the PhD program, students are engaged in full-time research towards the completion of a doctoral dissertation under the supervision of a faculty advisor.

MASTER IN ECONOMIC ANALYSIS (FIRST TWO YEARS of the grad. program.)

Preliminary Mathematics and Statistics courses. All incoming students must attend a two-week preliminary Mathematics and Statistics courses that take place before the start of official classes.

Organization of academic year. The first academic year is split up into 4 quarters of 9 weeks each (8 weeks of courses and 1 week of exams). Each course meets for 4 hours a week (32 hours in total). The second academic year is split up into 4 quarters of 8 weeks each (7 weeks of courses and 1 week of exams). Each course meets for 4 and 1/2 hours a week (31 and 1/2 hours in total).

First year courses. In the first year there are 12 courses of 5 credits each (60 credits in total). First year courses focus on the three core sequences (Macroeconomics, Microeconomics, and Statistics/Econometrics), in addition to Mathematics and Game Theory. All first year courses are compulsory. Students must attend class, hand in all required work, and sit for all exams ( quizzes, midterms, and finals).

Qualifying exams. At the end of the first year (mid July) students who plan to continue in the PhD program upon completing the Master’s degree must take the qualifying exams of the three core sequences. More information is provided under the heading "Admission to the PhD program”.

Second year courses. Second year courses consist of 8 courses of 6 credits each (48 credits) and a Master’s thesis (12 credits). Second year courses are organized into 3 fields: Econometrics, Microeconomics, and Macroeconomics. Students have to complete at least 2 fields. This implies taking at least 2 courses in each of the chosen fields. Students must attend class, hand in all required work, and sit for all exams ( quizzes, midterms, and finals).

Master’s thesis. Students must submit a Master’s thesis at the end of the Master’s program (mid September). Exceptionally, there could be an early submission in mid July, please consult with the direction of the program. The Master’s thesis should be written in English and take the form of an academic paper. Students must send an email to the
secretaries of the program with a title, an abstract, and a brief outline of their Master’s thesis by the 15th of May of their second year. Before then, each student must have agreed with a faculty member to supervise the Master’s thesis. Finding a topic and a faculty advisor is the student’s responsibility. We recommend students to start talking to faculty members early on in their second year with the objective of finding a good match. We strongly advise students to first find the supervisor and the topic in agreement with him/her. Having an advisor who does not belong to the faculty of UC3M is possible, but in that case there should be a co-advisor from UC3M. Students who wish to take an outside advisor should talk to the Director of the Master’s program. For students who continue with the PhD program, the professor who supervises the Master’s thesis often becomes the PhD advisor, though that need not always be the case. At the end of the second year (beginning of September) students must hand in the final written version of the Master’s Thesis. Master thesis submission requires of the approval of corresponding supervisor. In case the supervisor does not support the submission, the director of the program will seek advice from other faculty members. This is followed by an oral presentation and defense around mid-September in front of a committee proposed by the Director of Graduate Studies. Any faculty member or student is welcome to attend these defenses.

To help you finding a topic the department organizes two events. In the first one, “meet your professors”, faculty members talk about their research experience in around six presentations, and in a second (the 23rd of April), students defend orally a research proposal for 15 minutes (plus 5 minutes of questions). Note that this means that students should have found their supervisor before that date.

Course registration. Students register online in September (more information available in the documentation sent by CEAES).

Grading. Each course and the Master’s thesis get a numerical grade and a letter grade. The equivalence between letter grades and numerical grades is as follows:

A: between 9 and 10
B: between 7 and 8.9
C: between 5 and 6.9
D: below 5

A grade below 5 is a failing grade. A student failing a first year course has the possibility of retaking the exam a second time at the end of the first year (approx. around July, see below). A student failing a second year course, must either retake the exam a second time at the end of the second year, or complete credits by substituting the failed course by another course without violating the field requirements.

Retakes. Each student failing a course can sit for a retake in July of the same academic year. The retake exams are the same day as the corresponding qualifying if any. Otherwise, they have a separate date also in the beginning of July.

Class attendance. Regular attendance to the courses is compulsory. Insufficient attendance may lead to the withdrawal of financial support (if any) and can affect negatively the student’s grades. Students requiring a leave of absence due to medical reasons or justified personal reasons must apply by sending an email to Angélica (ala@pa.uc3m.es) and Arancha (phd@eco.uc3m.es) with CC to the program director. In their application, they should specify dates and the reason for absence. Authorization requires an affirmative answer by the program director. The student must also report to
the instructors involved.

**Departmental seminars.** There are 3 weekly seminars (Macroeconomics, Microeconomics, and Applied Economics & Econometrics). Second year students expecting to enter the PhD program have to regularly attend at least one seminar per week (the list of seminars for all three workshops can be downloaded from the following site:

Seminar attendance is monitored by signature sheets. We provide the model at the end in Appendix A. Every time a student attends a seminar, he or she should ask the signature of a faculty member. Students must hand in their signature sheets to the Graduate Program Administrative Assistant (Arancha or Angélica) before Christmas (no later than Friday 12th of December), before Easter (Friday 27th of March) and before the summer (Friday 19th of June). Seminars are a very important part of research and help in shaping one’s research agenda. As a result, those students who fail to report sufficient assistance (no less than 6 seminars per term) will not receive the department support, particularly so for scholarships, job applications, prizes and so on. This is also a sufficient reason to withdraw financial support, if any. Students are also highly encouraged to meet seminar speakers to discuss about research (there is typically one agenda for the day the speaker is at the department; you can sign up by sending an email to Esther Catalan, ecatalan@pa.uc3m.es) though this may be more useful once you have started to work on your dissertation. These meetings allow the student to develop new ideas, improve the ones they are working on, as well as to obtain positive externalities from networking.

**Tutoring.** The department provides tutoring to first year students. Each student will be assigned a member of the academic staff who will be happy to meet and discuss any issue related to the program. It is strongly suggested that students report to their tutors upon arrival to the program, and at the end of each of the terms to assess performance.

**Course Evaluations.** At the end of each term, in order to monitor teaching quality, students must fill out teaching evaluations for all the courses they have taken. There are two surveys about teaching evaluations, one run by the department and another one by the university. We are trying to reduce the administrative load and we’ll be happy to eliminate one of these surveys once they become redundant.

**Exchange through ENTER network.** The Graduate Program is part of the European Network for Training in Economic Research (ENTER), an initiative by eight of the leading economics departments in Europe. Second year students who have completed most of their coursework have the possibility of spending a quarter in one of the other institutions of the network. More information is provided under the heading "ENTER network".

---

**IMPORTANT DATES**

Academic Calendar for First year students:

Welcome reception for incoming students: September 3

Mathematics Introductory course: September 4-12 from 9.00 to 11.00

Statistics Introductory course: September 4-12 from 11.30 to 13.30
PRELIMINARY DATES

Qualifying dates in July (first chance)

Qualifying and Retake Econometrics: TBA

Qualifying and Retake Macroeconomics: TBA

Qualifying and Retake Microeconomics: TBA

Retake Mathematics I: TBA

Retake Mathematics II: TBA

Retake Game Theory: TBA

Qualifying dates in September (second chance)

Qualifying Econometrics: September, 2.

Qualifying Macroeconomics: September, 3.

Qualifying Microeconomics: September, 4.

Some 4th Term courses are usually taught by external instructors. The dates of these courses may vary depending on the schedule of their visit to the department. You should consider that they may easily extend to the first week of July (with examinations ending at mid-July).
PRELIMINARY DATES

April 20: Presentation of the Research Project for the Master Thesis
May 25: Deadline submission Master Thesis Proposal
June 19: Send Seminars’ attendance sheet
September 10: Deadline submission Master Thesis

We may incorporate an early defense date in mid July. It will be announced with sufficient time.
September 17: Defense Master Thesis

Ph.D students (from third year onwards)
- September 18: Deadline for applications for seminars at an ENTER institution.
- November 13: Deadline to apply to ENTER Jamboree.
- Week of November 11: Workshop Presentation of third year papers.
- December 11: Students willing to defend their Thesis during 2015 submit their JMK paper.
- Send Seminars’ attendance sheet on December 12, March 27, and June 19

Holidays:
- Christmas break: December 22 - January 7 (both inclusive)
- Easter break: March 30 - April 6 (both inclusive)

ADMISSION TO THE PHD PROGRAM

Qualifying exams. At the end of the first year of the Master's program (mid July) students who are planning to continue with the PhD program must take three qualifying exams that cover the three core sequences: Macroeconomics, Microeconomics, and Statistics/Econometrics. The content of these exams is based on the material covered in the first year of the corresponding courses. To pass the qualifying exams, it is necessary to pass all three exams. Students who fail a qualifying exam can retake it only once in September. We see these qualifying exams as a great opportunity to settle all the core knowledge students acquire along the first year.

Admission conditions. Admission to the PhD program requires the successful completion of the Master’s degree as well as meeting the following conditions:
1. An average grade of B in the first exam of the first year courses (i.e. retakes are not
counted). The way this average is computed is as follows: in each course an A gets +1, a B gets 0, a C gets -1, and a D gets -2. Then, the sum of all first year courses is taken, and this should add up to at least 0. Students just below this cut-off are allowed to apply to the Director of Graduate Studies for an exemption, though chances are limited.

2. An average grade of B in the first exam of the second year courses, though this requirement may be overruled with sufficiently good grades on the qualifying exams.

3. Pass the three qualifying exams. More information on the qualifying exams is given below.

All marginal cases are analyzed at the end of each academic year by a commission composed by the instructors of the PhD program and the Directors of Graduate Studies and a final decision is made.

**PhD in Economics (Third Year Onwards)**

*PhD advisor.* Early in the beginning of their third year students should find an official PhD advisor: a formal document should be signed by the advisor (no later than six months after the beginning of the academic year). Multiple advisors (i.e., co-advisors) are allowed, but at least one of the advisors should be affiliated with Universidad Carlos III (one of the co-advisors may be external.) Having an external co-advisor is subject to the approval of the Director of Graduate Studies. As mentioned before, the PhD advisor is often, but need not be, the Master thesis' advisor. It is expected that the PhD student will be included in one of the scientific grants of the PhD advisor as a way of contributing to certain expenses, such as presenting at conferences and workshops.

*Departmental seminars.* There are three weekly seminars (Macroeconomics, Microeconomics, and Applied Economics & Econometrics). Second year students expecting to enter the PhD program have to attend regularly at least one seminar per week (the list of seminars of all three workshops can be downloaded from the following site: http://www.eco.uc3m.es/index.php/en/research/seminars-and-conferences). Seminar attendance is monitored by signature sheets. We provide the model at the end in Appendix A. Every time a student attends a seminar, he or she should ask the signature of a faculty member. Students must hand in their signature sheets to the Graduate Program Administrative Assistant (Arancha or Angelica) before Christmas, before Easter and before the summer. Seminars are a very important part of research and help in shaping one’s research agenda. As a consequent, those students who fail to report sufficient assistance (no less than 80% of all seminars of an area) will not receive the department support, particularly so for awards, scholarships and job applications. Students are also highly encouraged to meet seminar speakers to discuss about research (there is typically one agenda for the day the speaker is at the department; you can sign up by sending an email to Esther Catalan, ecatalan@pa.uc3m.es). These meetings allow the student to develop new ideas, improve the ones they are working on, as well as to obtain positive externalities from networking.

*Student workshops.* The PhD students run a student workshop. All PhD students are required to present their work in this workshop, at least once a year. Work in progress is admissible.

*Reading groups.* The fields usually organize regular reading groups, with the attendance of faculty and PhD students, as a way of exchanging research ideas and presenting relevant papers. We strongly encourage all PhD students to enroll in one of these
groups.

**Third year paper.** By the end of July the third year students must hand in their third year paper. This is an important milestone. The third year paper will be evaluated by one of the faculty members (other than the student’s supervisor). The evaluation consists of a short referee report that provides comments and states whether the paper has the potential of being turned into a job market paper in the next twelve months. Students are expected to present their third year paper in the student workshop. Students who do not fulfill their third year paper requirement will be reevaluated in terms of their financial aid and their departmental duties.

**Fourth and fifth year students.** During the fourth and fifth year the students should work on their dissertations, present at least once a year in one of the departmental seminars or workshops (providing an English-written copy of their paper). It is expected that the student emails before his/her seminar to faculty members working in fields related to the seminar’s topic. The list of faculty members to be invited can be decided by the student, together with his/her advisor.

**Extensions beyond the fifth year.** Only in very exceptional cases, the department might provide funding for an extra year beyond the fifth year. In order to apply for a year extension, students must submit a comprehensive report on their progress no later than April 30th to the PhD Director. An accompanying letter of the PhD advisor that includes a realistic time estimate for the completion of the thesis is also required. The PhD Commission will make a decision on a case by case basis and will inform the student in due time. Certain regulations from the University or the Ministry of Education may place limits on these extensions and set deadlines for the PhD thesis defense. In any event, the thesis should be defended – with no exceptions - no later than the end of the sixth year.

**Presenting in conferences.** Students are encouraged to present their work in high quality academic conferences and workshops. Most often the related costs are covered by one of the scientific grants of the PhD advisor. However, this depends on the availability of funds.

**Academic visits to other institutions.** PhD students are encouraged to spend time in other institutions if this is deemed positive for their academic progress. If they wish to spend time at other institutions, they should have the support of their PhD advisor and of the Director of Graduate Studies. Visiting another institution should be relatively easy. Students should plan ahead of time to cover their teaching and/or administrative duties, if it applies. More information can be obtained under the heading "Teaching and administrative duties".

**PhD completion.** Students are expected to complete their dissertation by the end of their fifth year. More information on the PhD defense is given under the heading "PhD thesis defense".

**Job market.** Students are expected to go to the job market on their fifth year. Each year the PhD Advisory Board selects, on the basis of their performance, the students the Department will endorse on the academic job market. The endorsed students will be helped to prepare for the job market (by giving a job market seminar and by mock interviews) and may receive some limited financial aid to attend the job market meetings in the US, the UK and Spain. The Department’s job market officer coordinates the job market effort. More info on the current job market candidates can be checked at http://www.eco.uc3m.es/index.php/en/department/job-market-candidates.
**Academic progress.** Students who do not make sufficient progress towards the completion of their PhDs will be reevaluated in terms of their continuation in the program, financial aid and/or departmental duties.

**Academic or other leaves.** The Graduate Program in the Department of Economics is a full-time program, and in the absence of a valid reason students are expected to be in the Department during the entire academic year that goes from September 1st to July 20th (with the exception of official holidays) and that includes all exam periods, both at the undergraduate and the graduate level. Valid reasons include spending research time at other academic institutions in the context of a student’s academic training or a medical problem. A student who wishes to take a leave (with the exception of those related to academic issues already authorized by the supervisor) of more than 5 days should send an email to the PhD Director and to the student’s advisor (with copy to the Graduate Program Administrative Assistant, Arancha or Angélica) explaining the reasons for the planned leave and the dates of the leave. He or she should then get approval from both the PhD Director and the student’s advisor.

---

**PHD THESIS DEFENSE**

**Requirements of the thesis.** The thesis should consist of 3 academic research papers or 2 if they are both very strong papers. At least 2 of the chapters should be at a level sufficient to be submitted to top field journals (so-called B journals according to our Department’s ranking).

**Job Market paper evaluation.** By December of the year in which the thesis is to be defended, the student must submit his/her job market paper to the Director of Graduate Studies. Two referees will read it and provide comments by January/February. This not only helps the student for the job market, it also allows to speed up the process of the thesis evaluation later during the year. These two referees will typically be part of the internal committee, as described below.

**Internal committee evaluation.** When the student and his/her PhD advisor believe the thesis is ready to be defended, they inform the Director of Graduate Studies. An internal committee of 3 people is then formed to evaluate the thesis. The composition of the committee is decided by the Director of Graduate Studies with input from the PhD advisor. The committee may include professors who are not on the faculty of the Department, but at least one of the three members should be a full-time faculty member of the Department. It tends to be a good idea to have two members from outside the university, since this helps for the formal defense. The mission of the internal committee is to decide whether the thesis is ready to be defended in the internal thesis seminar of the Department.

**Defense in the internal thesis seminar.** Once the internal committee has approved the thesis to be presented, the student has to defend his/her thesis in an internal thesis seminar at the Department. The student’s presentation should be in English, last about 50 minutes, and focus on the main contributions of the thesis. After the student’s presentation and a round of questions, the PhDs in the room deliberate, and decide whether the student is ready for the formal defense.

**Formal defense.** The committee for the formal defense is set up by the student’s PhD advisor (after consultation with the Director of Graduate Studies). The committee should
consist of 3 people ("titulares") and 1 substitute ("suplente"). At most one person may belong to Universidad Carlos III. Upon successfully defending, the student is awarded a PhD in Economics.

More details. There is a document that explains all the details of the PhD defense. Please contact the Graduate Program Administrative Assistant for a copy (Angélica Aparicio: ala@pa.uc3m.es or Arancha Alonso: phd@eco.uc3m.es).

ENTER Network

ENTER. Our Graduate Program is a member of the European Network for Training in Economic Research (ENTER), an initiative by eight of the leading economics departments in Europe, all of them with international graduate programs: Universitat Autònoma de Barcelona, Université Libre de Bruxelles, Universität Mannheim, Stockholm (Stockholm School of Economics and University of Stockholm), Universiteit van Tilburg, University College London, and Universidad Carlos III. The ENTER network fosters the exchange of students and organizes the yearly "Jamboree". For more information see: http://www.enter-network.org/en/

Student exchanges. Second year Master’s students who have completed most of their coursework may spend some time at one of the other institutions of the network. PhD students also have the possibility of visiting up to one year one of the members of the network. Visiting students pay the academic fees in their home institution. Spending time in another institution of the network is subject to approval by the Director of Graduate Studies of the home institution and by the ENTER coordinator of the host institution. Before leaving, students have to comply with their teaching and/or administrative duties. More information is provided under the heading "teaching and administrative duties".

Annual "Jamboree". The annual network meeting, the so-called "ENTER Jamboree", consists of a 2-3 day workshop and takes place in February in one of the network institutions. Each institution typically sends 4 student presenters, 4 student discussants, and 1 faculty presenter. A couple of months before the Jamboree there is a call for applications, and a number of fourth and/or fifth year students are selected by a committee appointed by the Director of Graduate Studies. Their basic travel expenses are funded by the Department.

Student presentations. Every year each institution of the network selects two or three PhD candidates who wish to present their work at another ENTER node with travel costs covered by our own program and accommodation costs covered by the inviting institution (typically at another student’s house). Preference is given to fifth year students who will be going to the academic job market.

2. FINANCIAL SUPPORT

Financial support. First year students of the master program may be offered financial aid including fee waiver and/or a monthly stipend through a Teaching Assistantship (TA) position. The renewal of the financial aid to the second year students of the master is conditional on the academic performance in the master. In particular, the financial
support is automatically renewed to students achieving an average of B or higher (computed as explained above) or passing all the qualifying exams. The department also offers financial support to those students that do not meet the former criteria but whose performance is sufficiently satisfactory. Students that have failed no more than one subject in the first year should expect to get financial support in the second year. Other students may also get financial support depending on the availability of TA’s positions and their fit with these positions. We expect to offer around 15 TA’s position to second year students, though the final number may vary depending on the students’ performance and the teaching needs of the department. Students admitted in the PhD program (3rd year onwards) get automatic financing for the 3rd to 5th year of their studies in our graduate program. However, it is required from them compliance with all the duties of the program and with the code of conduct of the University. The Department supports the students that apply to external funds. The Department may also ask students to comply with some administrative procedures conducting to their external financing. Students rejecting external financing should not expect automatic financial support in the terms of this paragraph from the Department. Students with scholarships from outside institutions may have to produce regular progress reports, typically every 24 months, to maintain those scholarships.

First year students that do not get financial support in the first year should expect the same treatment (described above) with respect second year and consequent years in terms of financing.

### Teaching Load and Departmental Services

All students in the program with financial support obtained directly from Department with a TA position or with external funding obtained with the support of the Department are required to contribute to the teaching load or the other administrative duties in the Department.

The standard teaching load is as follows:

<table>
<thead>
<tr>
<th>YEAR</th>
<th>TEACHING HOURS</th>
<th>ANNUAL GROUPS</th>
<th>HOURS WORK</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>0.75</td>
<td>1</td>
<td>4.5</td>
</tr>
<tr>
<td>2</td>
<td>1.5</td>
<td>2</td>
<td>9</td>
</tr>
<tr>
<td>3</td>
<td>2.25</td>
<td>3</td>
<td>12</td>
</tr>
<tr>
<td>4</td>
<td>3</td>
<td>4</td>
<td>15</td>
</tr>
<tr>
<td>+5</td>
<td>3</td>
<td>4</td>
<td>15</td>
</tr>
<tr>
<td><strong>TOTAL</strong></td>
<td><strong>10.5</strong></td>
<td><strong>14</strong></td>
<td><strong>11.1</strong></td>
</tr>
</tbody>
</table>

The first column indicates the student’s year, the second column the effective number of teaching hours per week, the third column the number of groups per year and the fourth column the number of hours that should be devoted to teaching in total (preparation, grading, ...)

---

1 Students performing below the average required for admission to the PhD program may be required additional teaching in the first and second year with the condition of never surpassing an average of three annual groups per year (counting all the years in which they had financial support).
In addition, students are asked to help to proctor exams during the exam periods of January-February, May-June and July and, possibly, help to grade assignments or quizzes.

Instead of teaching, students may be asked to collaborate in administrative duties or research activities in the Department. In those cases, the workload is similar to the teaching workload.

Students who wish to spend time at other academic institutions must make plans in advance to cover their teaching and/or administrative duties. Typically this involves doing extra teaching and/or administrative duties in advance of leaving. The approval of the Director of Graduate Studies and of the student's advisor (during the PhD years) is required.

**TA responsibilities**

- **Lecture attendance:** TAs are expected to attend all lectures the first time they teach a given class or whenever the professor deems it necessary.
- **Small group classes:** TAs are required to be present for all their small group classes. In case of a medical emergency, the TA should notify the instructor and find a replacement.
- **Grading:** TAs are responsible for all the grading of the small groups they are responsible for. This includes the grading of problem sets, quizzes, midterms, both finals (January, May and June), as well as the so-called “revisión” of both exams (January, May and June). Grading should happen in a timely fashion, never exceeding more than a week, and grades should be posted on Aula Global within that same deadline.
- **Class material:** TAs may be asked to help out with the preparation of class materials, such as solving problem sets or exams.
- **Office hours:** TAs need to organize 2 weekly office hours and post them on Aula Global during the first week of class.
- **Communication:** TAs should regularly communicate with their instructors, and should answer emails from their students in a timely manner.
- **Proctoring:** TAs are required to proctor the exams of the courses they teach (two exams per course: ordinary and retake, the latter is usually at the end of June-beginning of July), in addition to another 4-5 exams per exam session (January, May and June). Proctoring is a specially sensitive activity and proctors are required the most diligent attitude. Failure to comply with standard norms of conduct may lead to academic sanctions.

**Time commitment**

The average actual weekly hours worked by a graduate student should not exceed those given in Column (4) of the table above. Of course the workload may vary from week to week, for example, because of grading during exam weeks. If the actual average hours worked consistently surpass this number, the TA should document his/her hours and contact the professor as well as the Director of Graduate Studies so that a solution can be found.

**Teaching training**

- Experienced TAs that have been identified as “excellent” will attend the small group classes of first-time TAs (and TAs that underperform) to provide them with constructive feedback and comments.
- Professors will also be encouraged to occasionally attend the small group classes of their TAs with the same objective of providing feedback and comments.
Evaluations

- Each quarter there will be one Outstanding TA Award.
- Teaching evaluations will play a role in the assignment of teaching responsibilities. Students with good evaluations (and positive feedback from their course coordinators) will be given priority in choosing their teaching duties.

Assignment of teaching duties

Before the start of each quarter students will be asked their teaching preferences. Students with good teaching evaluations will be given priority in the assignment of their teaching. An effort will also be made to limit the number of different courses TAs need to teach, especially for those students with good evaluations.

Other duties

Some students will be doing administrative duties for the Department or act as Research Assistants. If so, their time commitment will be the same as those of TAs.

Failure to perform

Any instructor who encounters a TA who is failing to perform his or her responsibilities should contact the Director of Graduate Studies. If the problem persists, the Department Chair will deal with the matter. Should the TA continue not to meet his or her responsibility, appropriate action will be taken.

3. ADMINISTRATIVE ASPECTS OF THE GRADUATE PROGRAM

Health Insurance

Students usually get health insurance from the national health service (Seguridad Social). However, the situation varies a lot depending on whether you have financial support or your nationality. Please, ask the graduate administrator or assistant.

Paperwork

Grade transcripts, proof of admission, and any other official (or unofficial) certificates are provided exclusively by CEAES (the University's Graduate Administrative Office). Contact person is Luly Dorado (Office 11.0.03, Phone: +34916245751, odorado@ceaes.uc3m.es).

Certificates of anything to do with your working status at the University (such as your income) are provided by RR.HH. (the University's Human Resources Department). The contact person is Ramón Mora: rmora@pa.uc3m.es.

You are strongly encouraged to first consult with Arancha Alonso (the Department's Graduate Program Administrator) before contacting CEAES or RR.HH. Her contact details
Students do not have to pay any registration fee, but have to pay 40 € aprox. for administrative fees. These costs are subject to change. These fees have to be paid at the beginning of each academic year in the offices of CEAES. Please, contact to: Luly Dorado (Office 11.0.03, Phone: +34916245751, odorado@ceaes.uc3m.es).

**WHO IS WHO**

**Department of Economics**

Arancha Alonso  
Graduate Student Administrator  
Office: 15.2.20  
Phone: +34 916248624  
Email: phd@eco.uc3m.es  
Responsibility: coordinator of administrative issues of Master and PhD students.

Angélica Aparicio  
Administrative Assistant  
Office: 15.2.20  
Phone: +34916245756  
Email: ala@pa.uc3m.es  
Responsibility: administrative issues of Master and PhD students

Andrés Erosa  
PhD Program Director  
Office: 15.1.17  
Phone: 91 624 9600  
Email: aerosa@eco.uc3m.es  
Responsibility: academic issues of PhD Program

Luisa Fuster  
Master's Program Director  
Office: 15.2.13  
Phone: 91 624 9331  
Email: lfuster@eco.uc3m.es  
Responsibility: academic issues of Master's Program and admissions

Carlos Velasco
