

JMC SEMINARS IN POLITICAL ECONOMY

DESCRIPTION: The **JMC Seminars in Political Economy** is a series of academic events jointly sponsored by the **Juan March Institute** and the **Institute of Economics at the Universidad Carlos III de Madrid**. Its main goal is to bring together scholars from different fields that share an interest in topics at the intersection between Economics and Political Science. It aims to offer a venue for the presentation of new and original work by prominent researchers, an occasion that should serve to foster lively and rigorous discussion among the faculty, researchers and graduate students of Madrid's academic community.

FREQUENCY: The goal is to have five sessions, possibly six, during the academic year.

FORMAT: Each session will consist on the presentation of two research papers, one by a scholar from outside of Madrid and one by a scholar from any of the city's research institutions. If they wish, assistants may later join the speakers for a social gathering.
