Public-private partnerships in the health services: A global perspective

Experience and lessons from Spain, Lesotho, Latin America and Southeast Asia

Fundación Areces June 22, 2015

Workshop 2: 11:30- 13:30

Speakers:

- Elizabeth Brashers, MBA, Deputy Director Global Health Group, University of California San Francisco
- Adela Llumpo, MPH, Director, Deals Practice Healthcare, PwC

Panel of discussants:

- Roger Feldman, Professor, University of Minnesota
- Manuel García Goñi, Associate Professor of Economics, University Complutense de Madrid
- Guillem López-Casasnovas, Professor of Economics, University Pompeu Fabra
- Richard Scheffler, Distinguished Professor of Health Economics and Public Policy, University of California, Berkeley

Agenda

- Growth of Public-Private Partnerships Around the World
- Innovation in Valencia: Beyond La Ribera
- Experience and Lessons from Other Regions
 - Lesotho
 - Latin America
 - Australia & Southeast Asia
- PPP Success Factors

UCSF Global Health Group / PwC PPP Fellowship Program

Partnership to increase documentation, and advance understanding of PPPs around the world

UCSF Global Health Group knowledge and research capacity

PwC advisory services and PPP experience

Case studies to date:

- Case study of the Lesotho PPIP
- Landscaping of PPPs in Latin America
- Case study of innovations on the Valencia PPIP model
- Landscaping of PPPs in Southeast Asia and Australia

Growth of Public-Private Partnerships Around the World

Review of the PPP model

Public-private partnerships (PPPs): a form of long-term contract between a government and a private entity, through which the parties jointly invest in provision of public services

Key characteristics:

- Long-term contracts (typically 15+ years)
- Shared investment or asset contribution
- Private sector takes on significant financial, technical and operational risks, and is held accountable for defined outcomes
- Government retains ownership of the facility; responsibility reverts to government at the end of the project
- Shared risk between public and private partners means both have "skin in the game"

Growing interest in health PPPs around the world

Many countries embarking on healthcare PPPs to leverage private financing and expertise in infrastructure development and service delivery to improve public health services

Government

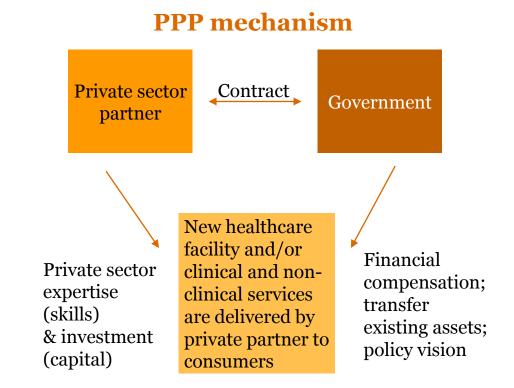

Enable governments to leverage private sector expertise and investment

Private Companies

 Reduce risk of private investment and ease barriers to entry into new markets

Health System

• Improve health infrastructure and service provision

Typical drivers and benefits of PPPs

Infrastructure

Human Resources

Financing

Accessibility

Affordability

- Need to expand capacity and/or replace aging public facilities
- Opportunity to leverage private financing
 - Increased speed of construction
- Opportunity to harness private sector management skills
 - Better Human Resource management
 - More flexible hiring/staffing practices
 - Improved IT systems
 - Improved supply chain management and supervision
- Improved clinical outcomes

Evolution of the Model

Private Financing

Public agency contracts with a private entity to **design**, **build**, and **finance** facilities

PPPs: Financing + Non-Clinical Services

Private entity **designs**, **builds**, **finances** and **operates** facility - including **delivering non-clinical services** (laundry, food service, laboratory, etc.)

PPIPs: Financing + Clinical Service Delivery

Private entity (or consortium) designs, builds, finances and delivers clinical and non-clinical support services

Higher Risk

Higher Reward

A Growing Trend

Innovation in Valencia: Beyond La Ribera

Building on the La Ribera Model

# Highlights of follow-on projects

#### Torrevieja – 2006

Asisa & Ribera Salud

- Expansion of the model
- Valencia's primary tourist destination; demand for healthcare services varied by season
- Struggled to define captive population

Ribera Salud & Asisa

**Elche Crevillent- 2010** 

- New PPIP hospital in close proximity to traditional hospital
- Stimulated performance improvement through competition
- Leveraged lessons learned from prior PPIPs

Denia - 2008

DKV & Ribera Salud

- Conversion from a public hospital to a PPIP model; first replacement hospital
- Significant investment in IT infrastructure
- Challenges with transition planning

Sanitas

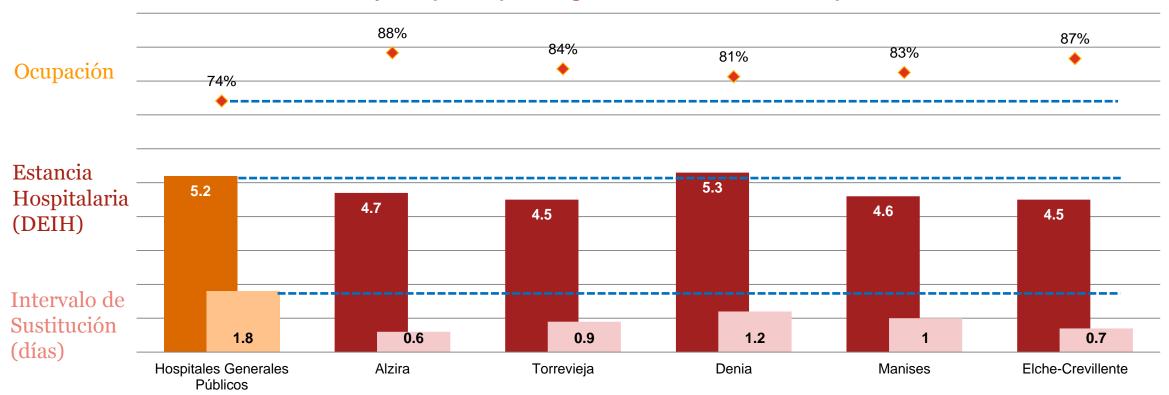

**Manises - 2009** 

- First urban PPIP & multi-hospital PPIP (general, chronic disease, multi-specialty)
  - Implemented aggressive recruitment strategies & new talent management approaches

13

# Success story: PPIP hospitals are significantly more cost effective

#### **Key Hospital Operating Statistics - Valencia Hospitals, 2012**

Dirección General para la prestación asistencial. Conselleria de Sanidad. 2012.

PPIP hospitals have higher occupancy rates and lower turnover intervals

# As more people are covered by the PPIP model, the greater the financial benefit to the state

#### Population coverage and health expenditure per person: PPIPs vs Government DOHs

(bubble size represents percentage of population covered)

Source: Ministerio de Salud de Valencia Contabilidad de los gastos reales

# Lessons learned: strengths & opportunities

#### Information Systems

Integration across different levels of care within the same department (e.g. primary, acute, urgent care)

# Strategic Planning

Resource efficiencycentered model

# Role of the Government

Guarantor of health services

#### **Flexibility**

Simplified organizational structure Shorter response time Scalability & efficiency

#### People & Change

Focus on prevention Patient engagement Performance incentives

# Communication and Sponsorship

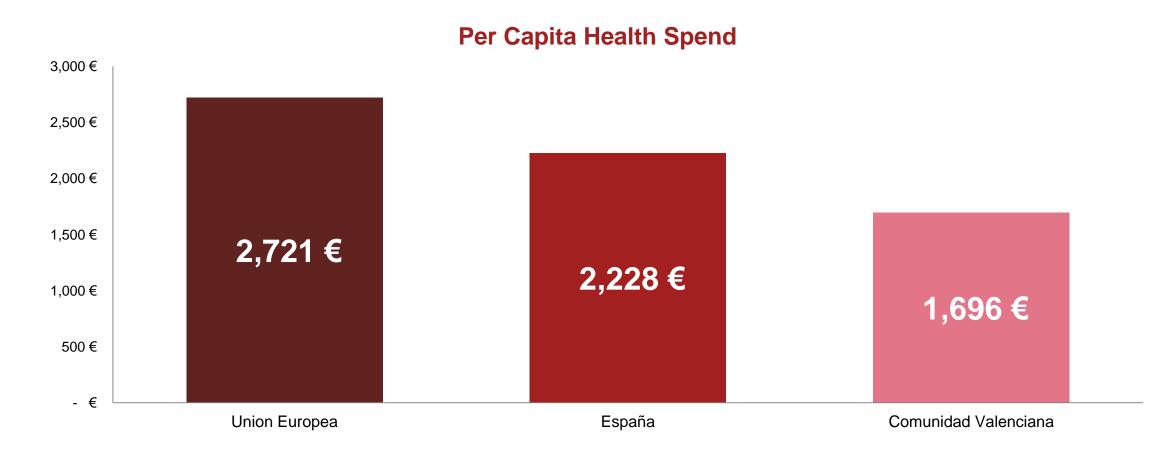

Open communication Developed trusting relationship with government

Integrate patient health information across other health departments Benchmark-driven performance improvement plans

Fine tune management skills from provision of healthcare services to supervision of contracts Automated adjustments to services in response to changing needs

Government should share performance results with the general public Formalize communication channels that are transparent, continuous and effective

# Per capita spending on health in Valencia is one of the lowest in Spain, and guarantees health services equivalent to those of the European Union

# Experience and Lessons from Other Regions

- Lesotho
- Latin America
- Australia and Southeast Asia

# Lesotho

# Lesotho: Queen 'Mamohato Memorial Hospital PPIP

#### **Successes**

- First ICU/NICU in Lesotho
- Improved supply chain & HR management
- Benefits since opening: major decrease in maternal and child deaths
- Supported by IFC
- First PPIP in a lower income country

#### **Challenges**

- Financing delays in World Bank loans
- Budget/space constraints
- Significant cultural change for staff
- Challenges since opening:
  - flooding of system due to insufficient investment in referral clinics leading to explosion of costs
  - change in government: new government less keen

Kingdom of Lesotho

Queen 'Mamohato Memorial Hospital

Replacement national referral hospital and feeder clinics; \$153M investment Private partner: Tsepong (Pty) Ltd (private consortium) 425 beds Opened 2011

# Latin America

# The maturity of PPP markets in Latin America

# **Economic** outlook

Size and stability of a country's economy is a key indicator of its ability to invest in infrastructure and one of the main attractors of private sector interest.

# Healthcare access

Level of healthcare access as defined by healthcare insurance coverage is a driving force for healthcare infrastructure to meet increasing demand for healthcare services.

## PPP legislation

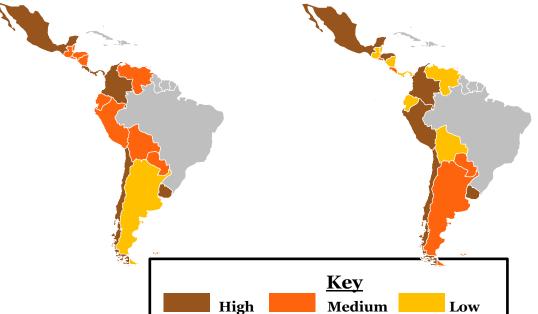

Established frameworks for PPPs have been known to increase not only the likelihood of PPP projects but also their ultimate success.

# Political will

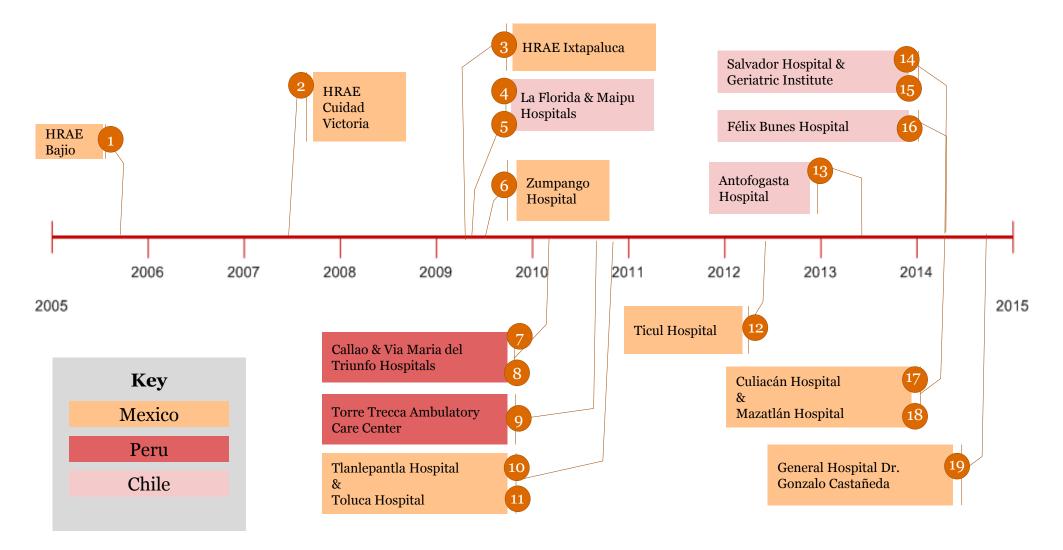

Commitment from the highest levels of government is necessary to bring PPP projects to fruition – particularly in the healthcare sector.

# 19 health PPP projects tendered to date

## Mexico

Hospital Regional de Alta Especialidad Zumpango

New hospital; \$96.3M investment

124 beds

Private partner: Teya Construction, SA

Opened 2009

#### **Successes**

- PPP framework since 2003, new PPP Law in 2012
- Going "green" innovation in hospital architectural design
- Multidisciplinary teams engaged early on
- 10 PPP hospitals to date at both federal & state levels

#### **Challenges**

- Aggressive timelines drove unnecessary government spending
- Hospital infrastructure with insufficient healthcare professionals
- Fixed operating costs despite low occupancy rates
- **Decisions driven by politics** instead of social need

### Peru

#### **Successes**

- Integration with primary care from the start
- Incorporation of patient satisfaction into performance metrics
- Innovative financing scheme
- First PPIP in Latin America

#### Challenges

- Political hurdles stalled projects
- Duplication of supervision and monitoring services
- Knowledge sharing beyond EsSalud

Hospital Alberto Leopoldo Barton Thompson & Primary Care Center

New hospital; \$39.9 investment

200 beds

Private partner: Callao Salud S.A.C

Opened 2010

## Chile

#### **Successes**

- Standardized and transparent legal framework for hospital concessions
- Payments tied to occupancy rates
- Financial incentives to reward outstanding performance
- Change management included within the contract
- 5 projects to date; initial pilot informed later projects

#### **Challenges**

- Healthcare PPPs are highly politicized
- **Cumbersome tender process** can result in prolonged timelines
- **Change in political party** has halted further PPPs

Antofogasta Hospital

\$300M, replacement hospital 671 beds Private partner: Sacyr Concesiones Opened in 2013

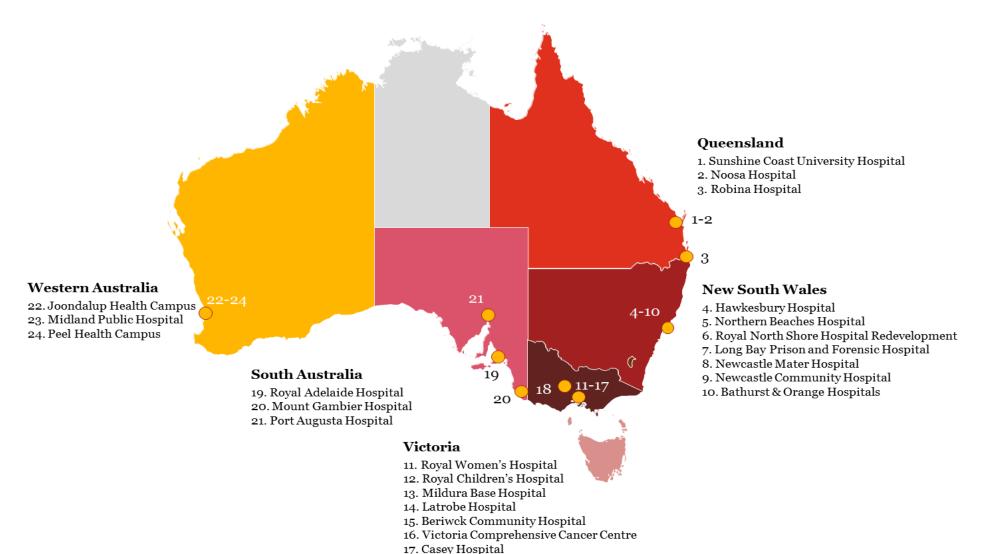

La Florida & Maipu Hospitals

\$313M, new hospitals 375 & 391 beds Private Partner: San Jose/Technocontrol Opened 2009

# Australia and Southeast Asia

# Long History of PPPs in Australia

UCSF Global Health Group & PwC 28

18. Bendigo Hospital

# Long History of PPPs in Australia

#### **Successes**

- Over 24 PPP projects operating or in construction
- Strong PPP framework and guidelines
- Strong stakeholder engagement
- Incentivization and allocation of risk

#### Challenges

- Government support and capacity to manage PPPs has varied over time
  - Several projects returned to government control in late 1990s/early 2000s
- **PPP guidelines** designed for non-clinical projects
- Assessing and delivering value for money
- Alignment with long term planning

Joondalup Health Campus

Perth, Western Australia New hospital, AUD \$42.1M 450 beds Private partner: Ramsay Healthcare Opened 1998

Midland Health Campus

Perth, Western Australia New hospital, AUD \$340M 307 beds Private partner: St John of God Healthcare Group To open in 2015

# Early Experience in Southeast Asia

#### **Summary of Healthcare PPP Market Maturity Factors**

Country	Legal & regulatory framework	Financial Facilities	Economic Outlook	Healthcare access
Indonesia	Low	Medium	Medium	Low
Malaysia	Low	Medium	Medium	Medium
Philippines	Medium	Medium	Medium	Low
Thailand	Low	Medium	Medium	Medium

#### **Overview**

- Social infrastructure PPPs are starting to emerge
- Several countries have started to enact PPP legislation
- PPP drivers include:
  - aging populations and increasing life expectancy
  - increasing prevalence of chronic and noncommunicable diseases
  - expanding economies
  - a desire to expand health coverage through social health insurance schemes

# Example: The Philippines

#### **Successes**

- Strong government commitment to PPPs
- Relatively clear guidelines and processes
- National PPP Center with dedicated PPP unit
- First major hospital project will be a full PPIP
- Range of smaller-scale hospital PPP projects related to diagnostic, equipment and other services
- PPP unit reviewing business cases for redevelopment of up to 70 hospitals (potential PPP projects)

### Challenges

- Risk sharing and financial transparency
- Performance management and governance
- Stakeholder engagement to manage public concerns

Ward in the current Philippines Orthopedic Center

Artist's impression of the future Center

Philippines Orthopedic Center, Manila

Replacement super-specialty tertiary orthopedic hospital 700 beds; 490 for low income/indigent population Private partner: Megawide To open in 2017

# PPP Success Factors

# Impact and lessons learned

#### **Benefits:**

- Projects have helped to improve systems and management: Human Resource management, IT, supply chain, hospital management
- Improved clinical and non-clinical service delivery
- Improved cost control

#### **Key challenges:**

- Insufficient financing and risk allocation
- Lack of trust and contractual flexibility to adjust to changing conditions over the life of the project
- Lack of clear PPP legislation
- PPP units lack capacity to manage contracts
- Lack of transparency in bidding process reduces number of bids and raises questions early on
- Change in political party/loss of support
- Project design not always matched with demand
- Community resistance project seen as "privatization"
- Staff/physician resistance to becoming private sector employees

## Thank You...
